

## About OSIsoft vCampus

OSIsoft vCampus is an online, subscription-based offering that provides everything members need to develop applications on the PI System. Focused on “doing it right,” this community-oriented program provides each subscriber with:

- A PI System for personal development
- Community experience with discussion forums and blogs
- An online library of articles, guidelines and documents
- Technical, interactive webinars

OSIsoft vCampus is intended to facilitate and encourage communication around PI System programming and integration between OSIsoft partners, customers and employees.

## OSIsoft Virtual Campus Overview

For three decades, OSIsoft has been focused on delivering operational infrastructure software products, known as the PI System™, to thousands of global companies. With such an infrastructure, it is important that our customers and partners are able to expand the PI System by building domain relevant applications that leverage their investment and integrate with other business systems.

To fully support the expanding number of significant application efforts with the PI System, we provide a place for developers and integrators to get all the resources and support they need:

- Development software (a personal PI System)
- A variety of resources (online library, interactive webinars)
- Online community of peers and a dedicated OSIsoft team (discussion forums, blogs)

This community strives to provide guidance and best practices, as well as encourage members to share experience and knowledge. We used the concept of an online virtual campus to structure these resources and call this community the OSIsoft Virtual Campus (OSIsoft vCampus).

*With hundreds of peers to interact with, OSIsoft vCampus provides an expanding community of developers with rich experience. Professional contacts interact on a wide range of topics and share expertise.*

## Membership

To become a member of the OSIsoft vCampus program, you can register and subscribe online (<http://vCampus.osisoft.com>). This is a must for PI System users and partners looking to maximize their investment of time and resources.

We offer three kinds of memberships based on your needs. The Individual Membership supports a single named user, while the Team Membership supports up to 10 named members and the Enterprise Membership supports all the technical deployment resources in your organization.

## Further Information

For more information on OSIsoft vCampus, you can review the online Frequently Asked Questions (FAQ) section (<http://vCampus.osisoft.com>)

## OSIsoft Virtual Campus Facilities

Resources in the OSIsoft vCampus are grouped into seven facilities that allow members to quickly access what they are looking for:

- **Library:** The Library contains different types of documents including: reference materials, examples that were previously posted on OSIsoft DevNet and user and programmer guides for all the PI System products provided with OSIsoft vCampus. White Papers, Tutorials and Accelerators are also routinely published.
- **Discussion Hall:** Several topic-centric discussion forums provide support and collaboration on a wide range of development and integration topics.
- **Auditorium:** Featuring the "Builders' Café" webinar series of interactive, technical webinars featuring OSIsoft technology and industry experts.
- **Bloggers' Place:** Several blogs published by various teams and people at OSIsoft, enabling dynamic information exchange and insights.
- **Training Center:** Current PI System training materials are now available from the OSIsoft Learning Channel on YouTube. Designed to take the learning experience to a whole new level, the OSIsoft vCampus Learning Lab lets you gain additional PI System experience and expertise by letting you test your knowledge, practice the skills you've learned from the YouTube videos on our test environments and try new things with the PI System that wouldn't be feasible to test on your production PI System.
- **Download Center:** Provided with the subscription is the OSIsoft vCampus PI Products kit, a complete set of PI System products to install and use as a personal development PI System. The subscription includes a PI Server™ License file supporting your membership term.
- **OSIsoft vCampus Live!:** OSIsoft vCampus Live! is a dynamic and interactive face-to-face event for gathering in-depth expertise on our technology through presentations and hands on learning sessions.

## About OSIsoft, LLC

OSIsoft ([www.osisoft.com](http://www.osisoft.com)) delivers the PI System, the industry standard in enterprise infrastructure, for management of real-time data and events. With installations in 110 countries spanning the globe, the PI System is used in manufacturing, energy, utilities, life sciences, data centers, facilities and the process industries. This global installed base relies upon the PI System to safeguard data and deliver enterprise-wide visibility into operational, manufacturing and business data. The PI System enables users to manage assets, mitigate risks, comply with regulations, improve processes, drive innovation, make business decisions in real-time and to identify competitive business and market opportunities. Founded in 1980, OSIsoft is headquartered in San Leandro, California, with operations worldwide and is privately held.
