WHY CHOOSE THE PI SYSTEM FOR YOUR OPERATIONAL DATA INFRASTRUCTURE?

PROVEN
You can trust the PI System infrastructure. Our customer base demonstrates this.

9 out of 10 of our first customers are still with us after 30 years

1,015 customer-led presentations and case studies

Pi System installed in 125+ countries

SCALABLE
The PI System will perform for whatever size job you have for it.

The PI System scales from one server to hundreds of interconnected servers

Many ways to get data in

700+ customers operate over 200 PI Servers

700+ customer-led presentations and case studies

Many ways to get data out

One large customer operates over 200 PI Servers

UNIVERSAL
Avoid long integration projects. The PI System can already connect you to your operational data.

Leverages all common automation standards

Reads data from the Top 10 automation and SCADA vendors

Reads data from thousands of systems and assets out of the box

SUPPORTED
Wherever you are, OSIsoft support will be there for you.

28% of OSIsoft staff is dedicated to supporting you

91% of support calls resolved by the first person to answer

1 million+ views on YouTube learning channel

16 countries with local OSIsoft support offices

9 languages supported

PERPETUAL
You can access today’s operational data for decades in the PI System.

Data is never averaged or off-loaded after a period of time, and always available at the original fidelity.

1 day

20 years

 Customers have a migration path

Our first customers migrated their data records from HP to VAX to UNIX to Microsoft and all versions in between.

Big and Fast
One customer monitors 532 measurement stations each with 40 data streams...

at 60 samples per second...

spread over 31 million km² and 10 US states...

all in real-time, all with

1 PI System

12,000+ sites deployed across diverse industries
